Subject Index

- Acidic upland surface waters, acidimetric titrations 155
Acidimetric titrations, limitations on use 155
Aquatic ecosystems, contamination by heavy metals 163
—, contamination by trace metals 203
—, contamination by uranium and thorium 191
—, nutrients 181
—, seasonal variation of iron, copper and zinc 175
Atmospheric aerosol, separation of submicron particles 261

Cadmium, trigger concentrations in soil 121
Carbon monoxide intoxication, effect of age on survival 41
Copper, seasonal variation in coastal ecosystems 175
Cyclone separator, calibration for atmospheric sampling 261
Cytochrome P-450 monooxygenase, level in organisms exposed to diesel oil 3

Fluoride, extraction from soil 247
Fluoride in soil, from an aluminium reduction plant 257

Halogenated hydrocarbons, accumulation in surface sediments and macrobenthos 21
Heavy metals, dynamics in coastal areas 163
—, in floodplain soils 135
Humic substances, characterisation by ^{13}C -NMR spectroscopy 69

Iron, seasonal variation in coastal ecosystems 175

Lead, trigger concentrations in soil 121

Macrobenthos, contamination by chlorinated hydrocarbons 21
Mutagenic activity, of wastewater extracts from incinerators 109

Particulate matter, accumulation of heavy metals in soils 227
—, interception and retention by plants 215
—, size distribution 241
Pollution monitoring, cytochrome P-450 monooxygenase content of aquatic organisms 3

Redevelopment of contaminated sites, setting trigger concentrations for cadmium and lead 121

Selenium, Physiological role in humans 85
Surface sediments, contamination by chlorinated hydrocarbons 21
Surface water quality, acidimetric titrations 155

Thorium, in aquatic ecosystems 191
Trace elements emissions, enrichment on particulate matter 95
—, from coal combustion 95
Trace elements intake, from consuming marine food 53, 63
Trace metals, in aquatic ecosystems 203

Uranium, in aquatic ecosystems 191

Zinc, seasonal variation in coastal ecosystems 175
